

Emsisoft Emergency Kit 1.0: A free emergency package for virus-infected PCs

Emsisoft now offer the Emsisoft Emergency Kit 1.0 for Windows, completely free of charge. Private users just need to unpack the kit onto their PC or a USB stick. This then provides them with several portable security tools that can be used to clean an infected computer or examine a new computer for signs of Malware infection. The Emergency Kit uses the high-performance Emsisoft Anti-Malware Scanner with its graphical user interface.

In brief:

- The Emsisoft Emergency Kit has been released
- Can be used for scanning and cleaning Malware-infected PCs
- Portable operation, e.g. it can be conveniently used directly from a USB stick
- Free of charge for private users
- The Emsisoft Emergency Kit Scanner currently detects well over 4 million pests
- Additional tools for expert users are also provided

Salzburg, July 2010 - What is the best way to deal with an infected computer? How can it be quickly and efficiently cleaned and brought back to normal operation?

Emsisoft, provider of the three security programs Anti-Malware, Mamutu and Online Armor, have now made their Emsisoft Emergency Kit 1.0 available to private users. It is fully portable, meaning that it does not need to be installed and can even be unpacked onto a USB stick.

Insert a USB stick and run: This makes it easy to clean infected PCs. Users can also cultivate the habit of checking every new PC that they use for possible Malware infection using the Emsisoft Emergency Kit before using the system.

The Emsisoft Emergency Kit includes the following programs:

- Emsisoft Emergency Kit Scanner:

The Malware scanner uses the proven Emsisoft Anti-Malware Scanner with its graphical user interface. The dual Scan Engine in this program currently detects well over 4 million pests, including Viruses, Trojans, Spyware, Adware, Worms, Dialers and Keyloggers. When the scanner detects a Virus the infected file can be deleted or placed in quarantine.

- Emsisoft Command Line Scanner:

This scanner provides the same functionality as the Emergency Kit Scanner but without the graphical user interface. The program is controlled using command line parameters instead. Expert users can thus easily integrate the program into automated batch processing actions.

**- Emsisoft HiJackFree:**

Experienced users can use this tool to detect and remove Malware in a very specific manner. The program provides complete control over the PC system, allowing direct access to active processes, drivers, services, Autostart entries and open ports.

- Emsisoft BlitzBlank:

Anyone having daily contact with Malware infections knows how hard it can sometimes be to remove pests when the operating system is already up and running. BlitzBlank deletes specified files, Registry entries and drivers during the boot process, before Windows and other programs have been loaded.

Christian Mairoll, the General Manager of Emsi Software, says: "In designing our Emergency Kit we have taken special care to make sure that it contains a portable scanner that allows any private user to immediately clean an infected computer - without needing to install any software. However, it was also important to us that we provide expert tools for dealing with individual infections that are especially difficult to remove." (2918 characters, released for free printing)

ABOUT EMSISOFT

Emsisoft's ambition is to produce and market the best anti-virus software for personal and commercial users. The rapidly growing company is a leading European supplier of behavioral analysis technology for detecting damaging software such as Viruses, Trojans, Spyware, Keyloggers and other Malware. Over 5 million users worldwide make use of Emsisoft products.

The company was founded in 2003 by Christian Mairoll, realizing his vision of a virtual company: The 20 company employees are distributed all over the world but work together as if they are sitting together in a real office. Emsisoft was commended with the Austrian "Constantinus" IT prize in 2005 for this innovative business management concept.

The Emsisoft product range includes the security programs Emsisoft Anti-Malware, Mamutu, Online Armor Firewall, HiJackFree and MalAware.
